RESEARCH INTERESTS

Developing interpretable machine learning methods to decode biological complexity — from 3D molecular structure to gene regulation.

CURRENT ACADEMIC APPOINTMENT

Cold Spring Harbor Laboratory, Cold Spring Harbor, NY

Computational Postdoctoral Fellow, March 2022 – present

- Mentors: [Justin Kinney](#) and [Peter Koo](#) (co-P.I.s)
- Affiliations:
[Simons Center for Quantitative Biology](#)
- Summary: My postdoctoral work has produced SEAM and SQUID, two interpretability frameworks for genomic deep learning, including a publication in [Nature Machine Intelligence](#) and an invited talk at [ICLR GEM](#).
- Awards:
 - F32 Individual Postdoctoral Fellowship (2024). Awarded by the National Human Genome Research Institute of the National Institutes of Health. Award Number: F32HG013265.

EDUCATION

Columbia University, New York, NY

Doctor of Philosophy with distinction, May 2017 – January 2022

- Doctoral Thesis: *Analysis of Conformational Continuum and Free-energy Landscapes from Manifold Embedding of Single-particle Cryo-EM Ensembles of Biomolecules*
- Mentor: [Joachim Frank](#)
- Affiliations:
[Department of Biological Sciences](#)
[Department of Biochemistry and Molecular Biophysics](#)
- Summary: My thesis work focused on the development, interpretation and refinement of a geometric machine-learning approach, called ManifoldEM, using manifold embedding to obtain the energy landscape and corresponding continuum of 3D structures of a molecular machine from an ensemble of cryo-EM images afflicted by low signal-to-noise ratio, random rotations and orientations in 3D space, and distortions introduced by microscopy aberrations. A complete description of my accomplishments is available in my thesis [1].
- Awards:
 - John S. Newberry Prize (2022). Awarded to the graduate student in the Department who, in the opinion of the faculty, is the "most promising student of the year in the field of vertebrate zoology". The awardee was chosen by faculty and staff nominations and consideration by the departmental faculty committee for graduate affairs.

Master of Philosophy, May 2017 – October 2020

Master of Arts, May 2017 – May 2019

- Cumulative GPA: 3.74
- Core Courses: *Advanced Genetic Analysis; Cell Biology; Eukaryotic Gene Expression; Genomics of Gene Regulation; Protein Thermodynamics; Structural Biology*
- Elective Courses: *Computational Linear Algebra; Cryo-Electron Microscopy; Statistical Mechanics; Topology*

Pre-thesis Rotations:

- [Califano Lab](#), Fall 2017: I conducted research under the guidance of Dr. Andrea Califano, exploring cell regulatory networks using information-theoretic algorithms (ARACNE, FIRE) to identify a set of maximally-informative DNA sequence motifs associated with the FOXM1 master-regulator pathway implicated in tumorigenesis.
- [Gautier Lab](#), Summer 2017: I conducted research under guidance of Dr. Jean Gautier, investigating the role of genome instability in cancer using various wet lab experiments—such as plasma purification, spectrophotometry, and electrophoresis—to isolate and analyze specific protein-gene interactions responsible for cellular response to DNA damage.

Georgia Institute of Technology, Atlanta, GA

Bachelor of Science in Physics with *Highest Honor*, May 2015 – May 2017

Cumulative GPA: 3.90

- Core Courses: *Classical Mechanics; Differential Equations; Electro and Magnetostatics; Electrodynamics; Linear Algebra for Calculus; Modern Physics; Quantum Mechanics I; Quantum Mechanics II; Statistical Mechanics; Thermodynamics*
- Elective Courses: *Biophysics; Computational Physics; Neurophysics; Nuclei, Particles and Fields; Physics of Living Systems; Probability and Statistics*

Undergraduate Research

- Supervisor: Professor [James Gumbart](#)
- Summary: My undergraduate research in Computational Biophysics, supervised by Dr. James Gumbart, focused on simulating the molecular dynamics of the Light Harvesting Complex-II using NAMD and VMD.

Activities and Awards

- *Sigma Pi Sigma* Physics Honor Society
- Faculty Honors

Georgia State University, Atlanta, GA

Initiated my pursuit towards a second degree (in Physics), May 2014 – May 2015. Transferred from Georgia State University (without degree) to the Georgia Institute of Technology

Cumulative GPA: 4.00

- Core Courses: *Calculus of One Variable I; Calculus of One Variable II; Multivariate Calculus; Principles of Chemistry I; Principles of Chemistry II; Principles of Physics I; Principles of Physics II*
- Elective Courses: *Computer Programming in Python*

Activities and Awards

- President's List

Georgia College, Milledgeville, GA

Bachelor of Arts in Mass Communication, May 2005 – May 2009

Activities and Awards

- *Lambda Pi Eta* Honor Society
- National Chair of International Business Club

TEACHING EXPERIENCE	<p>Cold Spring Harbor Laboratory, Cold Spring Harbor, NY</p> <p><i>Invited Lecturer</i> March 5, 2025</p> <ul style="list-style-type: none"> • “Decoding the Mechanistic Impact of Genetic Variation on Regulatory Sequences with Deep Learning”, Quantitative Biology and Artificial Intelligence In-house Seminar Series <p><i>Invited Lecturer</i> July 19, 2024</p> <ul style="list-style-type: none"> • “From Data to Discovery: Navigating Biological Complexity with Interpretable Machine Learning”, Bioinformatics and Computational Neuroscience Lecture Series

Invited Lecturer

March 6, 2024

- “Deciphering the Regulatory Landscape Encoded by Genomic Deep Neural Networks”, Quantitative Biology and Artificial Intelligence In-house Seminar Series

Invited Lecturer

July 21, 2023

- “From Data to Discovery: Navigating Biological Complexity with Interpretable Machine Learning”, Bioinformatics and Computational Neuroscience Lecture Series

Invited Lecturer

April 12, 2023

- “A Surrogate Modeling Framework for Interpreting Deep Neural Networks in Functional Genomics”, Quantitative Biology and Artificial Intelligence In-house Seminar Series

Columbia University, New York, NY

Invited Lecturer

November 9, 2021

- Cryo-EM Microscopy Center (CEMC) 2021 Fall Workshop

Teaching Assistant, R1 University

August 2018 – December 2019

- Assistant Instructor for BCHM GU4323: Biophysical Chemistry (Professors: **Dr. John Hunt** and **Dr. Art Palmer**)
 - Fall 2019
 - Responsible for weekly 1-hour recitation lecture, proctoring and grading. This course covered a rigorous introduction to the theory underlying widely used biophysical methods to understand the behavior of molecules and develop related analytical tools, including applications to biomedical research problems.
- Grader for BIOL UN2005 Intro Biology: Biochemistry, Genetics & Molecular Biology
 - Fall 2018
 - Proctored and graded exams.

Georgia Institute of Technology, Atlanta, GA

Creative Director & Animator, R1 University

May 2016 – February 2017

- Assisted the Department of Physics with the design and animation of educational content for Georgia Tech MOOC (massive online open courses) under advisement of **Dr. Michael Schatz**. Topics ranged from *Introductory Mechanics* to *Electromagnetism*. Duties included both scientific and artistic, beginning with the translation of physical concepts and theories into a visual language, and ending in the full production of animated video content for semester-long courses. After initial production, served as project lead on a team of animators for creating an extensive library of related videos for the university.
- Lesson 1 – Introduction to Electric Fields: <https://vimeo.com/237845454>

Georgia State University, Atlanta, GA

Physics Learning Assistant, R1 University

Spring 2015

- Recruited into the Learning Assistant program to aid in the education of students taking *Principles of Physics* under advisement of **Dr. Joshua Von Korff**. Duties included instruction of two one-hour Physics labs each week, attendance of weekly pedagogy lessons taught by Physics professors, and execution of a weekly theoretical practice lecture with graduate students.

Stanford University, Stanford, CA

Creative Director, Animator

2013, 2015

- Directed a team of animators for creating a series of educational videos detailing scientific research done by [Dr. Jennifer Aaker](#) and colleagues at Stanford on topics including empathy, humor, and purpose. The following videos premiered at the *Future of Story-Telling Summit* in NYC
 - The Happiness Narrative (2015): <https://vimeo.com/210360824>
 - Persuasion and the Power of Story (2013): <https://vimeo.com/74576399>

CREATIVE
BACKGROUND

Prior to entering science, I worked professionally in 2D/3D animation and motion design. Projects included clients such as Coca-Cola, Cirque du Soleil, and Stanford University. A portfolio and full history are available on my [LinkedIn](#) profile.

ADDITIONAL
TRAINING

Invited Participant

- [CIFAR Deep Learning + Reinforcement Learning Summer School](#) (July 25–29, 2022)
- [CSHL Computational Genomics course](#) (Nov. 29–Dec. 6, 2023)

General Participant

- CSHL Mentor Training Workshop based on the curriculum developed by [CIMER](#) (June 2023)
- SUNY Old Westbury Undergraduate Teaching and Pedagogy Workshop on course design, active learning, and inclusive teaching (Fall 2023)

SOFTWARE
SKILLS

Computer Programming:

- UNIX shell scripting
- Expertise in Python, with significant experience using TensorFlow, PyTorch, NumPy, Scipy, Pandas, Matplotlib, Mayavi, PyQt, TraitsUI and Anaconda, among others
- Experience in Matlab, R

Scientific Software:

- UCSF Chimera
- PyMOL
- Visual Molecular Dynamics
- RELION
- Phenix
- Prism
- Mathematica

Visualization Software:

- Adobe Illustrator, Photoshop, After Effects (2/2.5D illustration and animation)
- Cinema4D (3D illustration and animation)
- Final Cut Pro (Video editing)

Productivity Software:

- \LaTeX (\LTeX , \BibTeX),
- Microsoft Office, Excel, and PowerPoint
- GitHub

Operating Systems:

- Linux
- Apple OS X
